

LET'S SORT IT

Think about what you can
switch off when you leave

Do you have a desk lamp?

Do you have a desk fan?

Which monitors can you switch off?

What doesnt need to run overnight?

Tiny acts repeated by many all add up!

Take a picture and tag us on instagram at [let_sort_it](#)
This poster was designed using Ryman Eco for our friends at Rymans stationers. It uses 33% less ink than standard fonts which means if everybody switched to this font we could save 490 million ink cartridges and reduce CO2 emissions by 6.5 million tonnes every year.
