

LET'S SORT IT

Think about how you can improve your recycling

Rinse out your recycleables as dirty items can contaminate a whole bag

Tear off areas of paper and cardboard that are contaminated with grease

Look at the packaging and consider what pieces can be recycled

Ask facilities if recycling is collected seperately, if not try taking it home?

Take a picture and tag us on instagram at [let_sort_it](https://www.instagram.com/let_sort_it)

This poster was designed using Ryman Eco for our friends at Rymans stationers. It uses 33% less ink than standard fonts which means if everybody switched to this font we could save 490 million ink cartridges and reduce CO2 emittions by 6.5 million tonnes every year.
